In our time preservation is still a very big problem!
What does it take?

- Effective Management
- Keen Historical Sense

Record managers continue to devise standards to direct the disposition of historical files.

Record managers often do not see value nor appreciate the Historical value to data.

Vietnam- Many records from units assigned in combat zones made it back to the states however, many remain to be screened, evaluated, reorganized and deposition.

Basic Rule – If records constitute the data upon which important decisions were made or illustrate the decision making process ***archive it*!**
